

Technology Stack

Project Design Phase-II

Architecture:-

Elements	Description	Technology
User Interface	User inetrface with application webui and chatbox in mobile App	HTML,CSS,Python,React
Application	Logic for application	IBM Watson,IBM Assistant
Database	Datas and configuration	SQL,MANGODB
Cloud database	Database Service on cloud	IBM DB2, IBM Cloudant etc.
Storage	File Storage Requirements	IBM Block Storage or Other Storage Service or Local Filesystem
API	Purpose of External API used in the application	IBM Weather API, et
Infrastructure(server/cloud)	Application Deployment on Local System / Cloud	Local, Cloud Foundry, Kubernetes, etc.

Open-Source Frameworks	TINKER CAD, NODERED, IBM WATSON, MURAL, MIRO, PYCHARM
• Security Implementations	• Powerful security system for everyone's peace of mind No access data Hackers cannot access network
• Scalable Architecture	• EASY TO EXTEND THE NETWORK WITH THE AID OF THE BANDWIDTH OF THE NETWORK
• Performance	• AIDS MASSIVE RANGE OF USERS TO USE TECHNOLOGY
